MULTIDISCIPLINARY TEACHING COURSE ON PROSTATE CANCER

6 - 10 February, 2011 • Lisbon, Portugal

COURSE AIM

This 5-day teaching course aims at focusing on the management of localised, locally advanced and disseminated prostate cancer. It stresses the importance of multidisciplinary teamwork, where each sub-discipline is interrelated and information exchange is vital.

This will be illustrated during state-of-the-art lectures presented by experts in the field, covering important issues such as biology, imaging, pathology, therapy and future developments. Interactive case studies will be integrated on a daily basis and there will be ample time for open discussions amongst participants and experts.

TARGET GROUP

The course is aimed at radiation oncologists, urologists, medical oncologists and other specialists and trainees who have a special interest in prostate cancer and are willing to update their knowledge.
